City of Oberlin Water Treatment Plant Ultraviolet Disinfection – Design and Construction: \$474,000.00 from EPA STAG to equip the City's Water Treatment Plant (WTP) with ultra-violet disinfection technology necessary to meet the requirements of the Long Term 2 Enhanced Surface Water Treatment Rule.

This regulation, promulgated by the USEPA under the Safe Drinking Water Act, is intended to protect public drinking water supplies from microorganisms such as

Cryptosporidium

and

Giardia

.

The addition of UV disinfection to the City's conventional lime-soda softening treatment processes will be the

first

OEPA-permitted application of this technology to a public drinking water system in the State of Ohio .

UV disinfection technology will provide a state of the art, long-term solution to ensure the safe drinking water supply of the City of Oberlin and continued compliance with federal regulations.

The recipient is the City of Oberlin , 85 South Main St. Oberlin, OH 44074
